

FOR ARTISTS AND LABELS

Music Content Distribution

Packages and pricing

WHAT YOU GET • WHAT IT COSTS • HOW IT RUNS

WHAT THIS IS

A reliable stream of content built around your music.

Every month we produce short form content for your records and put it live across Instagram, TikTok and YouTube, using the formats and trends people are actually watching right now.

The goal is not views for their own sake. It is keeping your music in front of people consistently enough that it stays relevant, gets used, and works its way into trends.

NICHES

You send the song. We handle the edits, the formats, the captions, the posting and the reporting.

WHY THIS WORKS

This is how UK records break now.

Nemzzz: Elevate

Released October 2021, went viral on TikTok, and has since passed 114 million Spotify streams. His follow-up 2MS has passed 176 million.

Central Cee: Doja

Went viral on TikTok on release in 2022 and debuted at number two on the UK Singles Chart, number one in New Zealand and Greece.

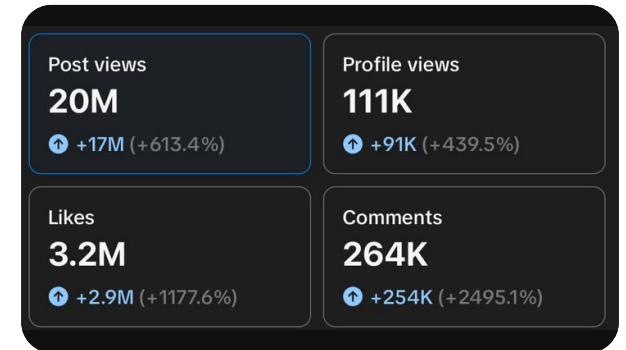

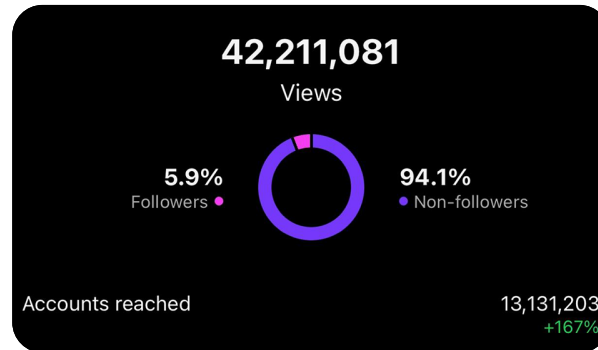

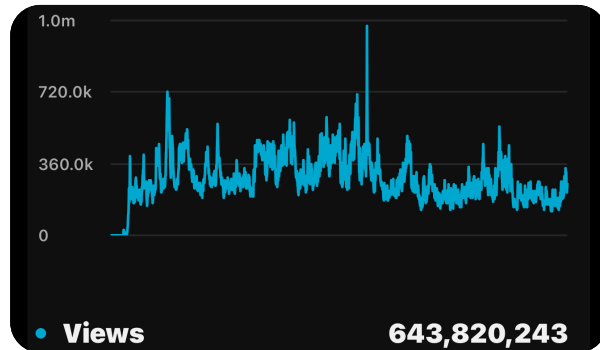

Central Cee: Let Go

A snippet posted to TikTok a week before release spread across the app, and the record arrived already in demand.

None of that happened by accident, and none of it happened once. Records break when a sound is put in front of the right audience, repeatedly, in formats they already watch. That is a system, and it is the system we run for you.

OUR TRACK RECORD

Seven years in short form. Over 3 billion views for clients.

We have been building and running short form distribution since before most of these formats existed, for brands, creators and rights holders across sport, entertainment and music.

WHERE YOUR MUSIC GOES

The seven niches we run.

Football edits

Meme and dancing comps

Pop culture edits

Basketball edits

Ranked formats

We run multiple pages inside every niche. Which ones your music goes on is agreed with you before anything is made.

Military and fight edits

News and culture

PACKAGE ONE

Minimum £1,000 /month

2

NICHES

3

PLATFORMS

What you get

Your track running across one or two of our pages, on Instagram, TikTok and YouTube. We choose the edits, we make them, and a manager signs off every one before it goes live. All ninety posts sit behind a single song, which is the highest concentration available at any price.

Worth knowing

Rolling monthly, so nothing to commit to beyond the first month. All we need is the song and your sound links. No click attribution at this tier, since on shared pages your clicks cannot be separated from the page's own traffic.

PACKAGE TWO

Standard £3,000 /month

300

POSTS A MONTH

2

3

NICHES

3

PLATFORMS

What you get

Three times the posts of the Minimum Package for three times the spend, spread across up to three niches so the track reaches more than one audience type. Room for two songs, though we usually recommend one, since three hundred posts behind a single record beats splitting them.

Worth knowing

Still rolling monthly. This is the volume tier for a release you are actively pushing rather than testing. If you reach the point of asking exactly where the streams came from, that is the Premium Package.

PACKAGE THREE

Premium £5,000 /month

SONGS

Why it is split in two

Our pages already have audiences, so posting on them produces a response almost immediately. Accounts built new for you have no audience yet, so they start slow and then compound. Running both means you get a result now and an asset that keeps getting bigger.

The accounts are yours

Three accounts, one page identity across Instagram, TikTok and YouTube, branded around your sound. Yours from day one and yours if you leave. Full attribution and the live dashboard are included. Three month minimum, paid upfront.

PACKAGE FOUR

Elite £10,000 /month

450

POSTS ON OUR PAGES

270

9

ACCOUNTS YOU OWN

7

SONGS

Three times the owned side

Nine accounts running as three separate page identities across all three platforms. Three directions tested in parallel rather than everything riding on one, and whichever breaks out first tells us where to point the other two.

The widest coverage we sell

450 posts a month across our network on up to four songs, so a release campaign and back catalogue can run at the same time. Full attribution and live dashboard included. Three month minimum, paid upfront.

Optional extras.

Live dashboard

HIGHLY RECOMMENDED

£400 /month • Minimum and Standard

Every post and account in one place, with our views on the same timeline as your Spotify and Apple streams.

Featured lander slot

£250 /month • Any package

A slot on the featured music page that every account in our network links to. Explained in full on the next page.

Additional geo

£150 /month • Premium and Elite

Targets a region outside the UK, for when your listeners are somewhere your streams are not.

Prerelease hold

RECOMMENDED

£500 /month • Premium and Elite

We build up between half a month and a full month of content ahead of your launch, then it all starts going out from release day.

Extra song

£200 /month • Any package

Adds another track to your allocation, for when you want to promote more than one record at the same time.

Mid-month song change

£150 /change • Any package

Swaps the running track before renewal, for when a release date moves or another song takes off.

Every account in the network links to one page.

01

The link in bio

Every account we run carries a single link in its bio. It does not go to a promo page or to us. It goes to our featured music page.

02

The featured page

A clean list of the tracks from artists who hold a slot. No branding, no clutter, just the music.

03

Straight to Spotify

Every entry links directly to that track on Spotify, so anyone who wants the song is one tap from playing it properly.

£250 /month holds you a slot on that page. Our pages keep growing with daily posting, so the traffic through that link grows with them. Some of it is people who heard your track in an edit and went looking. Some of it has never heard you at all.

Top placement and exclusivity are available. If you want to sit at the top of the list, or hold the page on your own around a release, send us an enquiry with what you have in mind and we will price it.

WHAT WE NEED FROM YOU

Two things. Three on the owned packages.

01

The song

A WAV or MP3 of the track you want us to push.
That is it.

02

Links to the sound

The official sound on TikTok and Instagram, plus your Spotify and Apple links, so every post attaches to your sound and the streams land in your account rather than someone else's.

03

Promo material

PREMIUM & ELITE

Music video footage, behind the scenes or press assets, dropped in a Google Drive folder. Up to 60 minutes of usable raw a month.

We approve the music before any deal goes ahead. Not every track works in these formats, and running one we cannot build around wastes your budget.

From payment to first post in one to two weeks.

01

The call

We listen to the music, agree the goal, and confirm which niches fit your sound.

02

Build

Accounts created, team briefed, editors assigned, formats written. One to two weeks, and we keep you updated throughout.

03

Go live

We confirm your start date. Daily posting begins and your dashboard opens from the first post.

04

Reviewed daily

A manager checks every video against a written standard before it goes out. Nothing is uploaded unseen.

Your month starts on the day we begin posting, not the day you pay. Setting up properly takes one to two weeks. We will tell you the date as soon as we have it, and the month runs from there, so you always get a full month of delivery.

THE POINT

You do not need to build a production team. We already have.

Editors, devices, accounts, formats, scheduling and someone checking every video before it goes out is a full operation, and running it badly is worse than not running it at all.

You send the song.
